

## **Seismic Alarm Links**

R.C. Stewart

30 September 2022

If there is an alarm and there is no internet access to MVO, these links can be used to see if the alarm was caused by a large earthquake.

All times on these sites are UTC (local time + 4hr).

### **IRIS helicorder plots for nearby stations**

Check for a signal at these stations at the time of the alarm.

- [ABD, Guadeloupe](#)
- [ANWB, Barbuda](#)
- [SEUS, Statia](#)
- [SMRT, St Maarten](#)

### **Latest earthquakes**

The alarm can be up to 1.5 hours after the origin time for a major earthquake on the other side of the planet.
