

Instrument Response Files

R.C. Stewart

2 July 2025

The CAL directory used by SEISAN was tidied up in the early 2000s. The contents of the directory prior to this are stored on *opsproc3* in *~seisan/data/responseFiles/piton-CAL-20240410*.

The resulting CAL directory contains files with three different response file formats.

The SEI and GSE files had been in use for a long time and their provenance is unknown.

The RESP files were downloaded from the Data Stream page of the Guralp digitiser interface. The files for HH1 and HH2 channels were manually edited as the channel codes were incorrect.
