

Volcanic Event Subclasses

R.C. Stewart

29 November 2021

These are the subclasses for volcanic events in SEISAN as used by MVO.

Current volcano sub-classes:

| | | |
|---|---|---|
| 1 | t | volcano-tectonic |
| 2 | h | hybrid |
| 3 | l | long-period |
| 4 | r | rockfall |
| 5 | e | lp-rockfall |
| 6 | x | explosion |
| 7 | s | swarm activity, record swarm as one event |
| 8 | n | noise |
| 9 | m | monochromatic (4Hz) |
| 0 | q | QUIT |
